In continuation and further development of our intensive trainings during the past years in Freiburg, we will take a new step in 2019, with new locations, a new structure and new topics.

For the first time, this course is mostly designed for advanced practitioners and those who already have an established meditation practice and are experienced in Transparent Communication by Thomas Hübl®.

The content of the training is dedicated to two movements. First, to the **aspect of embodiment**, where we will focus our attention on the deeply human qualities, that is, on those qualities that define us as humans. Here are the aspects that are important to us:

- **Body and Emotion**
- **Love and Compassion**
- **Clarity and Will**
- **Sensuality and Sexuality**
- **Realization and Manifestation of Impulses und Ideas**

Second, we will be moving into the **transcendental realm**, into the unnamable, into that which is beyond our regular experience or transcends our current world of experiences. We will work with more subtle frequencies such as **Light**, **Energy** and **Movement**, as well as with **Space** and **Stillness**, with **Not-Knowing** and **Eternity**.

We want to create a bridge from the transcendental to the deeply human realm, for instance via the relationship with my partner, my family, people in my neighborhood or my political and creative expression in the world. Bringing forth a culture of relating that is anchored in orientation towards the Higher also includes responsibility carried by relatedness.

As a group, we will be able to really get close to our longing for intimacy with life, as well as to find concrete answers for realizing our potential.

We will continue our use of integral maps, for instance Spiral Dynamics, as they provide a wonderful orientation aid for our development of consciousness and carry the potential of rich experience for all participants.
